SUMMARY

Software Engineer with a strong foundation in full-stack development, backend architecture, and cloud-based application deployment. Experienced in building and scaling web applications using modern frameworks like React, Node.js, Django, and Flask, with cloud infrastructure experience across AWS, Supabase, and other cloud technologies. Skilled in designing REST APIs, integrating AI automation tools, and delivering clean, production-ready code. Proven track record of leading teams, managing projects end-to-end, and collaborating with clients to translate technical requirements into real, working products. Focused on building impactful, scalable systems.

EXPERIENCE

Co-Founder

Octathorpe Technologies

May 2024 - June 2025, Karachi, Pakistan

- Led development of interactive 3D web apps using **Three.js** and **React Three Fiber**, delivering smooth, immersive experiences for clients.
- Built and deployed scalable backend APIs and services, optimized performance, and streamlined cloud infrastructure for cost efficiency.
- Instituted robust code review processes and standardized CI/CD pipelines, elevating software quality while minimizing deployment friction for diverse client projects.
- Managed small cross-functional teams, ensuring timely delivery of features, 3D integrations, and backend optimizations.
- Handled end-to-end client communication from gathering technical requirements to ensuring on-time, bug-free deployment across cloud platforms.

Technical Lead

Octathorpe Technologies

December 2023 - May 2024, Karachi, Pakistan

- Led core software architecture and hands-on development across frontend (React) and backend (Node.js/Python), focusing on scalable and maintainable codebases.
- Designed and implemented backend services and REST APIs to power real-time 3D applications and dashboards.
- Collaborated closely with 3D developers to bridge the gap between visuals and data, ensuring seamless integration with **React Three Fiber** environments.
- Executed performance profiling initiatives and refactored backend architecture utilizing Node.js, leading to significantly enhanced load times and more efficient data operations.

System Administrator

Afreej E Learning Solutions

June 2020 - December 2023, Wilmington, North Carolina

- Managed day-to-day operations of the e-learning platform, including student onboarding, progress tracking, and academic record generation.
- Built and maintained internal systems for managing transcripts, teacher assignments, and class schedules across 100s of students.
- Coordinated directly with instructors and students to resolve technical issues, ensuring smooth delivery of live and recorded sessions.
- Handled promotional campaigns and platform marketing efforts, helping grow active users through content and communication strategies.
- Oversaw end-to-end student lifecycle from enrollment to certificate issuance ensuring data accuracy and timely processing.

Python Developer Intern

Codsoft

September 2023 - October 2023, Karachi, Pakistan

- Assisted in building and debugging backend scripts for data processing, automation tasks, and small-scale APIs using **Python**.
- Worked on cleaning and transforming raw datasets for internal use, improving script runtime and reliability.
- Collaborated with senior developers to write modular, maintainable code and implement unit testing for core functions.
- Gained hands-on experience with version control (Git), Python libraries (like Pandas or Requests), and basic REST API consumption.

EDUCATION

Bachelors in Computer Science and Information Technology

NED University of Engineering and Technology · Karachi, Pakistan · 2025 · 3.81 CGPA

- **President – Data Engineering Club:** Led workshops, guest sessions, and student-led projects focused on real-world data solutions.
- **Core Member – AI Society:** Contributed to organizing hackathons, speaker sessions, and collaborative research events.
- **Member – Photography & Creativity Society:** Captured campus events and contributed to creative direction for official media.
- **Event Coordinator:** Helped plan and execute multiple university-level seminars, competitions, and student meetups.
- Participated in inter-university **tech competitions** and team-based coding challenges.

A Levels

Pakistan International School Jeddah · Jeddah, Saudi Arabia · 2021

- Awarded **75% merit scholarship** for academic excellence (2 A*s, 1 A)
- Elected **School President** for the 2020–2021 academic year
- Participated in **Model United Nations (MUN)** – 2020 & 2021
- Completed **15+ extracurricular certifications** across leadership, tech, and public speaking

SKILLS

Python, JavaScript, React, Next.js, Three.js, React Three Fiber, FastAPI, Flask, Node.js, Django, REST APIs, Supabase, PostgreSQL, MongoDB, Git, Docker, AWS (EC2, S3, IAM), n8n, LangChain, AI Automation, SaaS Development, Cloud Deployment, Backend Optimization, API Integration, Asynchronous Programming, CI/CD, Team Leadership, Client Communication, System Architecture, Cross-Functional Collaboration
